CubicsPlus®
Employ an Affordable Account Processing System That Empowers Your Credit Union to Compete Effectively With Institutions of All Sizes

High-Performance Solutions

- Integrated share, share certificate, drafts and IRA account processing
- Web-based lending integration for loan origination or Internet lending
- Wisdom™: Accounting from Fiserv – A highly integrated, powerful accounting package
- Wisdom: Asset Liability Management

Key Benefits

- Reduce the time required to train your employees
- Implement new products and services faster
- Integrate other products, services and third-party applications seamlessly
- Maximize productivity, efficiency and member satisfaction
- Simplify software changes and enhancements

Shorter Learning Curve With .NET™
CubicsPlus employs the latest technology, including Microsoft® .NET, a Microsoft SQL database, and a standard XML interface. That means CubicsPlus delivers a user-friendly look and feel that’s immediately recognizable to anyone familiar with Microsoft Windows®, with minimal staff training needed. CubicsPlus uses best-in-class industry practices to combine...
traditional speed key functions with point-and-click features, significantly reducing the time your staff needs to complete transactions and leaving more time to focus on members.

The CubicsPlus .NET framework provides an open interface that allows software changes and enhancements to be made quickly, easily and remotely. Your credit union can easily and seamlessly add, integrate and use products like automated lending solutions, asset liability management, and online ATM and debit processing. And you can deliver the services your members want, including Internet banking, bill payment and online lending.

Key Technology Features

- SQL relational database
- Windows Server® operating system
- .NET technology
- Point-and-click functionality
- Speed key functionality
- Smooth navigation through screens
