

## Product

### Performance View™

A Web-Based Business Intelligence Reporting Suite Enabling Comprehensive Data Analytics and Reporting for Your Enterprise Supply Chain

Real-time visibility into the costs and performance drivers of your supply chain is critical to making quick decisions and excelling in today's competitive, evolving markets.

#### **Empower Your Decision Makers**

Performance View from Fiserv produces daily core dashboards that provide a visual and intuitive overview of key performance metrics on the Web. The user-friendly drag and drop interface allows business users to create ad hoc reports to address your ever-changing environment. Performance View provides users with access and flexibility to their data without requiring technical expertise or external resources. The power of information is put into the hands of your subject matter experts to get the data they need, when they need it, the way they want to see it.

#### **Maximize Information Value**

Information from the full Currency Supply Chain Management suite is available for reporting, creating a single point of access to manage your entire supply chain. This allows you to produce new far-reaching value for your institution and for the customers you serve. Performance View is designed to simplify large volumes of data to quickly identify trends and drill down to the details necessary to manage exceptions

and track performance to goals. It allows you to quickly assess, diagnose and act on critical business decisions using the metrics that matter to you. Information can be delivered to your inbox and automatically distributed to all stakeholders by email.

#### **Expand Access While Reducing Architecture**

The Fiserv ASP or hosted solution provides users with all the benefits of Performance View without the infrastructure and resource concerns on hardware, application, maintenance, upgrades and data warehouses, creating scalability and budget flexibility for any organization. Users can access the ASP site securely from any location with Internet or intranet access.

#### **Key Benefits of Performance View**

##### **Operational Efficiency**

- Reports can be scheduled to automatically run and be distributed to all stakeholders
- Users of all skill levels will have the ability to create powerful reports and charts in a fraction of the time required by traditional reporting systems

##### **Performance and Opportunity Management**

- Dashboards simplify large volumes of data, allowing users to manage by exception
- Users can "drill down" to a fine level of detail to examine root cause and impact
- Real-time data offers instant access to information critical to operations

Fiserv is driving innovation in Payments, Processing Services, Risk & Compliance, Customer & Channel Management and Insights & Optimization, and leading the transformation of financial services technology to help our clients change the way financial services are delivered. Visit [www.fiserv.com](http://www.fiserv.com) for a look at what's next, right now.

## Branch and ATM Dashboards

### Internal Cost Savings

- Report systems can be complex, expensive and time consuming to develop and maintain in-house
- Ad hoc report creation directly from the desktop reduces workload on internal IT departments

- Replenishment and holding costs
- Vendor service levels
- Downtime by fault category
- Forecast and order performance

### Key Performance Metrics

Measure currency supply chain performance with these key indicators and create:

- Enterprise cash balances
- Cash deposits and withdrawals
- ATM availability
- ATM residual/utilization

Currency Supply Chain Management from Fiserv is a comprehensive and integrated set of solutions and consulting services that can help financial institutions, retailers and service providers optimize currency levels, reduce expenses and improve control.
