Commercial Center™: Corporate

Transcend Classic Barriers With Power, Convenience and Security

Commercial Center: Corporate from Fiserv, an e-banking and business services portal, leverages modular services, data transformation, and multiple delivery and accesses channels to create a highly flexible platform.

Fully Integrated Solutions
Commercial Center is a scalable banking solution that makes handling cash easy, with the user experience and sophistication that your business customers desire.

Its cash-management capabilities are designed for digital channels, have easy-to-use interfaces and enable notification and authentication via smartphones, tablets and wearable devices. A single platform facilitates a unified experience across multiple devices, while integrated security and analytics offer enhanced fraud prevention.

Features	Advantages	Benefits
Multichannel	Access to service from multiple devices	Competitive with large regional and money center financial institution offerings
Integrated security and analytics	Proven and proactive Federal Financial Institutions Examination Council guidance-compatible security solutions	Customer confidence, risk mitigation and audit simplification with Commercial Center: Security layered approach: browser, fraud analytics, strong payment controls
Dashboard	A virtualized banking center for the financial institution's business banking clients	Competitive dashboard with single sign-on, as well as public site access, marketing space, high-level actionable items, account information and message overviews providing high-use features in a streamlined user experience
Flexible reporting and account data export options	Simple integration with enterprise resource planning and accounting systems	Ability to compete with strong informational reports and templates. File exports for sophisticated client segments with accounting software and treasury workstation integration
Access to current and historic account information	Visibility into account balances and activity for effective cash management	Utilizes our expertise in real-time and batch file reporting options integrated with all the major core financial institution and credit union platforms
Self-guided mapping tool	Streamlines payment and fraud protection. File onboarding with simple file mapping	Eliminates costs and minimizes the support associated with file normalization required by back-office payment systems and check fraud applications
Entitlements	Grant permissions specific to the individual's role and payment authority	Minimizes financial institution onboarding time and support by providing company administration to business clients
Account transfers	Real-time balance verification and posting	One-to-one and one-to-many account transfers offer a financial institution's clients competitive cash position features

Fiserv is driving innovation in Payments, Processing Services, Risk & Compliance, Customer & Channel Management and Insights & Optimization. Our solutions help clients deliver financial services at the speed of life to enhance the way people live and work today. Visit fiserv.com to learn more.

Features	Advantages	Benefits
Payee-based payments	Payment entry simplification	Offer fee-based services to grow revenue while gaining client loyalty. Payment options include ACH, wire, check, or purchase card as one-time, scheduled or recurring transaction with transaction approvals. Payment file and template import supported
ACH and check positive pay	Identifies and prevents potential fraud	Mitigates financial institution and client risk related to ACH and check fraud. Gain operational efficiencies with features to easily return fraudulent items
Integrated alerts and notifications	Automates delivery of time-sensitive information based on client preferences	Offers financial institution support efficiencies through automated email or text notifications of transaction exceptions, approval requests and incoming payments received
Market segments	Increase revenue with cross-sale opportunities	Simple no-cost marketing option with branding opportunities for financial institutions to define market segments by vertical industries, geographic regions or other criteria
Secure messaging	Direct, secure and cost-effective communications between customers and the financial institution	The ability to send and receive secure mail and attachments can lessen or eliminate cost and client dissatisfaction associated with third-party secure email applications
