

Module

Commercial Center™: Security Safely Connecting to Your Business Clients

Commercial Center: Security from Fiserv is a comprehensive security platform designed to protect Commercial Center, the business banking and cash management application from Fiserv.

Fully Integrated Solutions
Commercial Center is a scalable banking solution that makes handling cash easy, with the user experience and sophistication that your business customers desire.

Its cash-management capabilities are designed for digital channels, have easy-to-use interfaces and enable notification and authentication via smartphones, tablets and wearable devices. A single platform facilitates a unified experience across multiple devices, while integrated security and analytics offer enhanced fraud prevention.

In addition to securing Commercial Center, the Security module has been extended to provide protection for your other online banking web applications such as lockbox, business bill pay and remote deposit. It provides a wide variety of information-reporting services, electronic payment and file transfer processing services.

Features	Advantages	Benefits
Single sign-on	User access to multiple sites with one login	Secure site access with consistent user and device authentication
Private browsing	Limited to approved sites	Reduces risk by avoiding sites with malware
Authentication (user and device)	Digital certificate and multifactor authentication (in-band and out-of-band)	Eliminates hardware token and third-party security product; supports SMS or text and push one-time passcodes
Malware protection	Man-in-the-middle, man-in-the-browser attack mitigation	Not susceptible to malware attacks
Encryption	Keyboard, data and transaction encryption	Data integrity
Entitlements	User-specific permissions	Limits user access to sites, functions, transaction entry and approval
Server-side site validation	Validates destination site SSL certificates	Prevents misdirection of users to false sites
Private cloud technology	Virtual service	Supports web and mobile devices
