

CorPoint®: Deposit Manager

Next-Generation Cash Management for Merchants

Cash is still the preferred payment method in more than half of all retail transactions worldwide. Managing the flow of cash, however, remains both labor- and risk-intensive for many retailers, eroding profitability and efficiency.

Manually collecting and counting cash for deposit is labor-intensive, error-prone and does not provide an easy way to reconcile store totals with your bank's deposit verification. Reconciliation is often performed days in arrears. This environment does little to ensure against cash shrinkage and theft. Managing these processes for multiple locations only magnifies these challenges. Today's merchants require advanced, integrated cash deposit solutions with pre-notification through the use of smart safe hardware devices to improve cash flow and reduce risk.

Deposit Intelligence and Cash Control

CorPoint: Deposit Manager from Fiserv is an advanced, integrated cash deposit solution that streamlines deposit handling. As retail personnel deposit cash into smart safe hardware devices, the solution allows managers to track the status of cash deposits and view detailed information for each retail location (for example, denominations and cashier totals). Deposit Manager is designed to be hardware- and cash-in-transit provider-independent, providing the flexibility to choose the vendor relationships that best fit your unique business challenges.

Remote Cash Capture Management

Using the full functionality of Deposit Manager allows you to deploy the same smart safe hardware device across your enterprise, regardless of the cash-in-transit providers used. Smart safe technology streamlines cash operations, automates cash counting, reconciles with the point-of-sale and balances to the cashier level. In this way, the solution improves security, increases cash availability, provides fingertip balance and reconciliation reporting and helps reduce transportation costs.

Deposit Manager works with any cash-in-transit provider without integration or technology challenges, and connects to any number of certified smart safe devices in each of your locations. The solution can also be configured to facilitate a single banking relationship for all retail locations. Merchants can receive same-day provisional credit for cash deposited into the smart safe. At specified intervals, smart safe devices send encrypted electronic deposit information to Deposit Manager, which sends the encrypted electronic deposit posting information to a financial institution for provisional credit.

The Deposit Manager Advantage

Deposit Manager offers elite deposit management tracking while providing efficiencies and business intelligence analytics. It improves deposit visibility for any size organization. The solution is available as a standalone or hosted software service.

Fiserv is driving innovation in Payments, Processing Services, Risk & Compliance, Customer & Channel Management and Insights & Optimization, and leading the transformation of financial services technology to help our clients change the way financial services are delivered.
