

Cash theft and shrinkage are on the rise.

How do you protect your margins and employees?

The Challenges of Cash Management

Loss from cash theft is on the rise.

Cash handling in stores is manual, time consuming and difficult to reconcile. Retailers risk loss from internal and external theft, compromising the safety of employees and customers.

CASH THEFT IS THE 2nd HIGHEST

area of loss for retail stores, and greater than bad checks, credit card fraud, refund fraud and Internet fraud combined

98 PERCENT OF THE COSTS

for accepting cash payments are due to armored transportation, cashier labor and risk from theft

27 HOURS ON AVERAGE

are spent per week counting, verifying, reconciling, and preparing cash deposits by store employees

The Opportunity for Retailers

CorPoint from Fiserv provides retailers a turnkey cash management solution to manage all cash needs on a single Web-based platform. With CorPoint, retailers place orders and connect directly to smart safe systems, and have full visibility of deposits, balances, denominations, cashiers and alerts on a Web portal or mobile device that facilitates provisional credit.

STREAMLINE CASH MANAGEMENT
