DNACreator[®]

Build Your Own DNAapps[™] to Enhance and Customize the Robust Functionality of your DNA[®] Account Processing Platform

Your DNA account processing system from Fiserv has the flexibility to be customized exactly as you see fit. Exercise the power of DNACreator from Fiserv to take full advantage of the capabilities that address your needs and differentiate your institution.

DNACreator gives you the power to enhance, modify and add unique capabilities to your DNA account processing system with DNAApps that extend functionality to meet your specific needs, address business issues and differentiate your institution. The same Microsoft[®].NET technology and extendable framework that make DNA open, powerful and flexible create the foundation for the game-changing DNACreator tool.

Empower Your Creativity

DNACreator is a unique and complete software development kit (SDK) that allows developers to access DNA authorizations, processes and data and incorporate them into customized DNAApps using industry standard technologies such as WinForms, SOAP- and REST-based Web Service APIs, Web Forms, Workflow framework, C# and Visual Studio. You can develop, test—and deploy validated solutions—directly into your DNA system, reducing your development costs and gaining the control to add new functionality on your schedule.

With DNACreator, your possibilities are endless:

- Deliver market-differentiating functionality
- Embed custom analytics, browser controls and sub-menus
- Create dynamic data inquiries
- Develop custom workflows
- Create custom process improvements
- Develop custom views that drill down into data or present graphical data views
- Tightly integrate internally developed applications and approved third-party applications

Getting Started is Easy

DNA clients can try the DNACreator software development kit for free to explore and test development ideas. It is available from the developer portal via the DNAAppstore[™] (www.dnaappstore.com), our unique online marketplace for buying and selling DNAApps.

Fiserv offers DNACreator training and certification in the classroom and through self-paced modules for those who wish to deepen their knowledge or deploy and market DNAApps on the DNAAppstore. In addition, the DNAApp developer portal has a well-organized forum, monitored by Fiserv development experts, that is actively utilized for DNACreator discussion topics. It is the perfect destination for sharing ideas and seeking development advice.

Fiserv is driving innovation in Payments, Processing Services, Risk & Compliance, Customer & Channel Management and Insights & Optimization. Our solutions help clients deliver financial services at the speed of life to enhance the way people live and work today. Visit fiserv.com and fiserv.com/speed to learn more.

Go Beyond the Release Cycle

Fiserv continually invests in improving our award-winning DNA platform, bringing you ongoing enhancements that add value. DNAcreator gives you additional flexibility to deploy new functionality outside of our standard release cycles. Fiserv reviews and validates DNAapps before anything is installed in a production environment or placed on the DNAappstore to ensure the highest quality. In addition, DNAapps created using DNAcreator are easy to implement. They are designed to not interfere with your system's base functionality, which can reduce the need for full system planning and testing.

Improve ROI by Marketing DNAapps

You can improve the return on your development investment and add new revenue streams by selling DNAapps on the DNAappstore, a global collaborative marketplace for sharing ideas and DNA enhancements. Validated DNAapps are made available on the DNAappstore, where other DNA clients around the world can try and buy them.

Key Benefits

- Develop custom DNAapps to suit your specific needs
- Enhance, modify and add unique capabilities to DNA
- Leverage a complete software development kit to develop, test and deploy new system features
- Add functionality when needed, without waiting for standard release cycles
- Reduce your custom development costs
- Boost ROI by marketing DNAapps to others on the DNAappstore
