

Product

Frontier™ Reconciliation

Mitigate Risk, Improve Operational Efficiency and Enable Regulatory Compliance in a SaaS Environment

The SaaS version of Frontier Reconciliation reduces implementation time and provides seamless access to Frontier Reconciliation. It is an ideal choice for companies that do not want to invest in their own IT staff, data centers, servers, and other infrastructure.

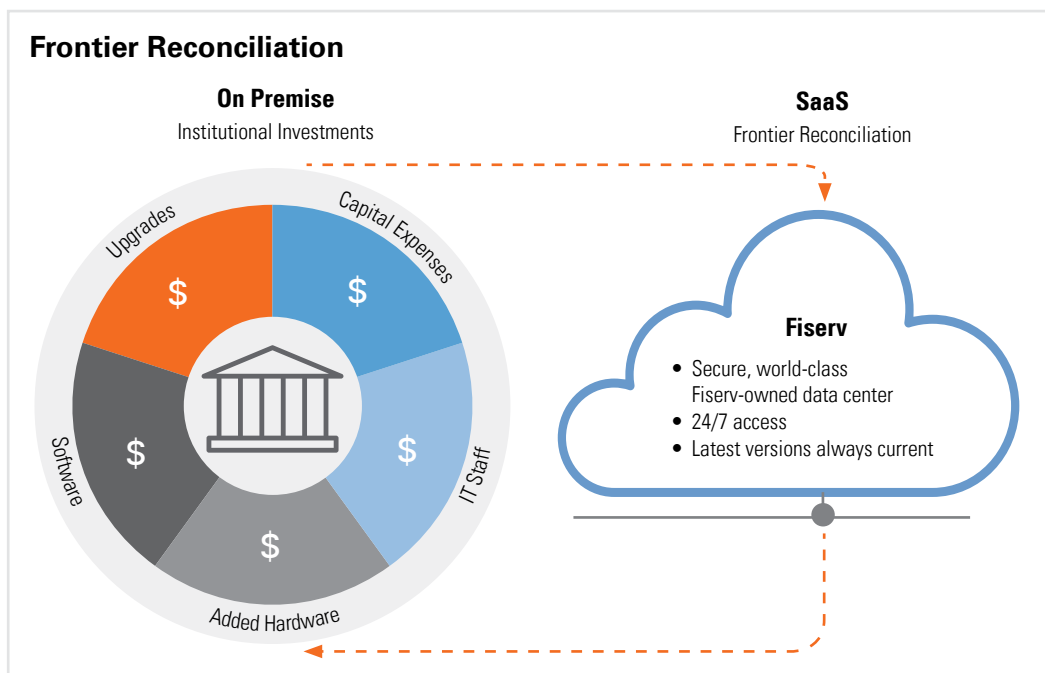

Frontier Reconciliation from Fiserv takes an enterprise approach to reconciliation and exception management, creating an optimal environment for effective risk management, unprecedented control and cost efficiency.

Certifications

- SSAE-16 SOC 1
- SSAE-18 SOC 1 (in-process)
- Level 3 Maturity Certification – Standard CMMI Appraisal Method for Process Improvement (SCAMPI)

Same Accuracy, Speed, Performance and Control at a Lower Cost

With more than 30 years of working with leading financial services and corporate customers, Fiserv knows that processing success begins with solid architecture and ensuring the security of your accounting and reconciliation processes to comply with today's complex regulations. That is why we offer two deployment options for Frontier Reconciliation – Software as a Service (SaaS) and in-house.

Fiserv is driving innovation in Payments, Processing Services, Risk & Compliance, Customer & Channel Management and Insights & Optimization. Our solutions help clients deliver financial services at the speed of life to enhance the way people live and work today. Visit fiserv.com to learn more.

The SaaS version of Frontier Reconciliation offers financial institutions a secure, cloud-based alternative to an in-house installation, with the same robust features. It is designed for institutions that want all of the power, scalability, unprecedented control and cost efficiency Frontier Reconciliation offers—without the capital expenses, hosting and software maintenance costs and IT resource requirements and expense. The cloud-based solution addresses your unique needs for accuracy, control, cost containment and speed.

Focus on Your Core Business

With the SaaS version of Frontier Reconciliation, you can focus on your primary business while Fiserv focuses on the technology. Your data is hosted in a secure, world-class, Fiserv-owned data center which is accessible to your staff at any time, from anywhere. All your institution needs to enjoy the power, flexibility and control that only Frontier Reconciliation can deliver is a high-speed Internet connection with a virtual private network. Fiserv manages all ongoing maintenance, solution upgrades and support.

Benefits of a Cloud-Based Solution

- No footprint on your workstations or servers
- Scalability and ease of integration
- Reduced cost of implementing and managing software
- Fiserv-provided seamless upgrades
- Data hosted by Fiserv in a secure, world-class data center
- Rigorous Fiserv testing and security standards
- Comprehensive answer center
- Separate, live off-site data recovery center for greater security and peace of mind

- Reliable performance from all locations including branch and back office locations

Migration from In-House to SaaS

If you are a current Frontier Reconciliation customer, you have the option of migrating to the SaaS version of the software. This means you can continue to experience the benefits of automated reconciliation along with the benefits accruing from using SaaS.

Reasons to Migrate to SaaS

-  Increased traffic to your application requires you to scale resources on the fly to meet the demand
-  You need to reduce operational costs and infrastructure overhead, while increasing IT effectiveness
-  You want to expand your business geographically
-  Keeping up with your storage needs is becoming a problem
-  You need a more robust disaster recovery system
-  You need to reduce the costs of administration tasks like database backup, software upgrades and periodic maintenance

If you have questions:

- How much will it cost?
- What are the steps to migrating to Frontier Reconciliation SaaS version?
- What are my resource commitments?
- What about the integration with my existing account processing platform?
