

SentrySM Cyber Security: Endpoint

Protect against complex and persistent cyberattacks with advanced security threat detection and prevention

Traditional security methods are no longer enough in the fight against cyberattacks. To protect sensitive data you need a layered approach that includes advanced threat detection and prevention with comprehensive monitoring, reporting and response prioritization.

Increasingly sophisticated cyber security attacks against financial institutions have created the need for more advanced, comprehensive solutions. Firewalls, legacy anti-virus and other defensive measures no longer adequately protect your data and reputation. Sentry Cyber Security: Endpoint from Fiserv provides financial institutions with a proven ally by managing your endpoint security needs and ensuring compliance with industry standards for data protection.

Endpoint is a critical component of Sentry Cyber Security, a portfolio of network security solutions that provides comprehensive and multi-layered protection for financial institutions. Our Endpoint solution is powered by CrowdStrike, a leading provider of endpoint detection and response, next generation anti-virus and managed threat hunting.

Advanced Endpoint Detection and Response

Easily deployed by installing a small application on endpoint devices such as laptops, PCs and servers, Sentry Cyber Security: Endpoint goes beyond malware to address complex cyber threats such as fileless ransomware and exploits targeting common vulnerabilities.

It effectively monitors, detects and helps to prevent malicious activity around the clock, without impacting user productivity or network performance.

Superior Security with Our Multi-Layered Approach

Sentry Cyber Security: Endpoint includes endpoint detection and response, next generation anti-virus, IT hygiene and managed threat hunting, enabling your institution to:

- Protect against malware and non-malware attacks
- Confidently replace legacy anti-virus with next-gen anti-virus
- Stop potential breaches before they occur
- Identify unauthorized systems, applications and use of privileged credentials in real time across your network.
- Watch your endpoints 24/7 and pinpoint malicious activities at the earliest possible stages
- Stop adversaries in their tracks with proactive threat hunting
- Deliver continuous and comprehensive endpoint visibility across detection, response and forensics
- Facilitate compliance with regulatory requirements and industry standards

Fiserv is driving innovation in Payments, Processing Services, Risk & Compliance, Customer & Channel Management and Insights & Optimization. Our solutions help clients deliver financial services at the speed of life to enhance the way people live and work today. Visit fiserv.com to learn more.

Sentry Cyber Security provides a comprehensive solution. Endpoint protection is complemented by Internet, Firewall, Assessment and Performance Services to provide multi-layered protection.

Whether you're converting to Fiserv solutions for the first time or have employed Fiserv products and services for many years, Sentry Cyber Security: Endpoint can deliver the protection and defense your business requires.

Comprehensive Managed Services

Sentry Cyber Security is part of the Sentry portfolio of offerings from Fiserv. Sentry features end-to-end managed services including network services, infrastructure services, cyber security, information technology (IT) lifecycle management and unified communications. Fiserv combines proven technology solutions with best-in-class services provided by professionals who understand your financial services IT operations. We offer complete design, management, support and fulfillment through a single point of coordination.

Key Benefits

- Enhance the safety and security of your network with our advanced endpoint security solution
- Protect your reputation, network and data from known and unknown threats, including malware and ransomware
- Leverage the experience and best-practice insights of a global technology leader serving the cyber security needs of financial institutions
- Cost-effectively leverage world-class cyber security professionals
- Focus valuable IT resources on business growth and strategic opportunities rather than continually-changing cyber defense
