SentrySM Infrastructure Services

In Today's Digital World, Data Protection and Business Continuity Have Never Been More Critical

With the pace of modern business, the cost associated with downtime or data loss is more serious than ever before. Cloud backup and disaster recovery services can help you reduce cost and complexity, while achieving greater efficiency, agility and scalability. Realize the potential.

Through Sentry Infrastructure Services from Fiserv, you can leverage cloud technology to help minimize risk, reduce operational expense and decrease IT complexity while remaining agile to address the core needs of your financial institution.

Choosing the right cloud partner is a critical decision for financial institutions that need a cost-effective way to manage infrastructure that scales into the future while meeting business, regulatory and compliance requirements. Leveraging industry-leading best practices, Fiserv provides end-to-end infrastructure services spanning assessment and migration to cloud-based back-up and disaster recovery.

Cloud Assessment Services

One of the most important first steps when considering a move to the cloud is an assessment of your current infrastructure to build a strategy for cloud migration. Fiserv can help you build a robust cloud strategy that assesses your readiness and quantifies the benefits in terms of cost, agility, speed and time to market.

Assessments evaluate your applications, infrastructure and data readiness for the

cloud. The analysis provides right-sizing for cloud infrastructure, reduces unnecessary costs and helps prioritize next steps so the optimal cloud environment is built to support business needs.

Cloud Migration Services

Once you have decided to leverage cloud services for your financial institution, Fiserv can provide the expertise needed to migrate workloads and applications to your preferred cloud environment. We can help you optimize your infrastructure to improve operational speed, performance, workload scalability, environmental security and stability.

Cloud Backup

Cloud Backup provides comprehensive data protection of critical assets with end-to-end encryption, customized retention capability, and off-site storage of point-in-time backups in the cloud.

Cloud Backup combines the speed, scalability and cost efficiency of the cloud with proven infrastructure management expertise from Fiserv. This will help you:

- Eliminate unnecessary costs
- Instantly enable backup

Fiserv is driving innovation in Payments, Processing Services, Risk & Compliance, Customer & Channel Management and Insights & Optimization. Our solutions help clients deliver financial services at the speed of life to enhance the way people live and work today. Visit fiserv.com to learn more.

- Meet compliance requirements and long-term retention targets
- Guard against data loss from ransomware

Cloud Disaster Recovery

Securely replicate critical systems from a primary environment to the cloud with Cloud Disaster Recovery. We'll help you ensure an up-to-date secondary copy is available for failover at any moment. We provide business continuity and reduced downtime during IT interruptions, minimizing costs without compromising compliance. Cloud Disaster Recovery combines the speed, scalability and cost efficiency of the cloud with our proven infrastructure management expertise to give you:

- Simple deployment and solution management from our trained cloud engineers
- Reduced infrastructure costs and total cost of ownership
- Minimized downtime and dependable recovery with advanced compression tools and deduping technology
- Test disaster readiness without ever going offline

Rest assured knowing that your enterprise and critical assets are protected with a comprehensive solution that will enable quick recovery, with minimal data loss and minimized disruption to your business.

Key Benefits

Reduce Cost and Complexity

- Reduce the burden on IT staff and lower costs for your on-premises infrastructure
- Minimize capital expenditures with no secondary site or additional hardware needed
- Pay-as-grow model and pay only for what you use

Improve Efficiency and Agility

- Simple, automated protection and disaster recovery in the cloud
- Increase agility with on-demand, near-limitless cloud scalability
- Easy to manage, automated replication, policy-based protection and one-click orchestrated recovery
- Built-in compression and deduplication minimizes network utilization
- Reduce data loss (RPO) and increase speed of recovery (RTO)

Increase Security and Compliance

- End-to-end data encryption
- Built-in protection for backups against ransomware
- 24/7 monitoring and management of protection and recovery
- No-impact recovery-plan testing
