

CyberSecureSM

**Protect Against Sophisticated and Persistent Security Threats
With Comprehensive, Multilayered Defense Solutions**

As cyber criminals become increasingly sophisticated in their attacks, the ability to protect your assets and data has become more challenging than ever. To protect against these threats and mitigate the risk to your business, Fiserv provides comprehensive, multilayered security solutions and services.

CyberSecure from Fiserv provides financial institutions with a proven ally in managing network security and complying with industry standards for protecting sensitive data. Our full portfolio of network security solutions provides the comprehensive and multilayered protection needed to ensure peace of mind for you and your customers.

The threat landscape is continuously evolving as cybersecurity threats become increasingly sophisticated. No financial institution is safe as adversaries – terrorist groups, hackers, criminals, organized crime and nation-states – target financial institutions of all sizes across the globe.

Defensive measures of the past are no longer enough to protect your data and reputation. Our layered solution extends your cyber defense from the perimeter of your network to each endpoint workstation and device. Our leading-edge approach monitors, detects and prevents malicious

activity with little or no impact on user productivity or network performance.

**Optimal Security From
a Multilayered Approach**

CyberSecure includes endpoint protection, internet, firewall, assessment services and performance services. Our robust suite helps you:

- Benefit from the experience and insights of a partner who serves the security needs of leading financial institutions
- Cost-effectively leverage world-class cyber security solutions and professionals
- Manage risk by examining and addressing key vectors where vulnerabilities might exist
- Enhance banking experiences by delivering the security, scalability and efficiency employees and consumers expect
- Facilitate compliance with regulatory requirements and industry standards
- Focus valuable IT resources on business growth and strategic opportunities rather than monitoring, managing and maintaining complex cybersecurity infrastructure

Whether you're converting to Fiserv solutions for the first time or have employed Fiserv products and services for many years, CyberSecure delivers the protection and defense your business requires.

CyberSecure: Endpoint

We offer next-generation, real-time threat detection and response from industry leader CrowdStrike to defend against malware-based and more complex, non-malware attacks such as ransomware.

Our endpoint solution identifies potential attackers and threats before they strike while monitoring, detecting and preventing malicious activity, with minimal or no impact on productivity and network performance.

CyberSecure: Firewall

We leverage our network security experts to provide, deploy, upgrade and patch network-facing devices to ensure your institution is protected from unauthorized network access. For ongoing peace of mind, our services include 24/7 firewall monitoring, log reporting and response to security and device health events, malicious code defense, web content filtering, hosted and managed virus protection solutions, and more.

CyberSecure: Assessment Services

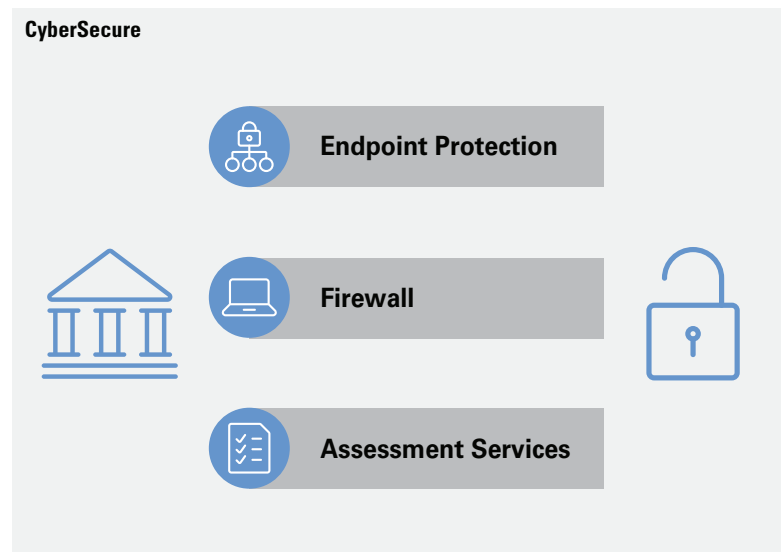

Maintaining a high level of security awareness requires a thorough understanding of your internal security posture. Using the latest tools and investigative techniques, we probe your perimeter network for vulnerabilities and provide a comprehensive report evaluation of your risks.

Our services provide detailed evaluations of your security infrastructure and processes with a clear and manageable mitigation road map. Assessments meet obligations to the Federal Financial Institutions Examination Council, National Credit Union Administration and Gramm-Leach-Bliley Act, and are available as a subscription or one-time service.

A Total Solutions Provider

CyberSecure is part of SentrySM from Fiserv with a portfolio of offerings that includes a complete managed services solution for your applications, network and IT management. Sentry combines a robust combination of proven technologies and experienced professionals who understand financial institution operations and regulations.

Protection From Sophisticated and Persistent Cyber Attacks

Our scalable, high-performance security and defense services provide a barrier against adversaries and peace of mind, allowing you to focus on growing your business and enhancing service.

The portfolio includes complete design, management, support and fulfillment services through a single point of coordination. With CyberSecure, Fiserv provides end-to-end managed services including network services, infrastructure services, cybersecurity, IT lifecycle management and unified communications.

Advanced Threat Intelligence, Cyber Forensics and Incident Response

CyberProtectSM from Fiserv, a next-generation security platform previously available to only the largest banks and government agencies, provides advanced threat intelligence, cyber forensics and incident response services.

A complementary service to CyberSecure, CyberProtect is offered in partnership with BlueVoyant and provides proactive detection combined with real-time remediation, event orchestration, an interactive portal and compliance solutions. It is backed 24/7 by world-class experts in geographically diverse security operations centers.

Fiserv is driving innovation in Payments, Processing Services, Risk & Compliance, Customer & Channel Management and Insights & Optimization. Our solutions help clients deliver financial services at the speed of life to enhance the way people live and work today. Visit [fiserv.com](https://www.fiserv.com) to learn more.
