

File Exchange: Transmission Services

Enable Efficient File Delivery
Between Financial Institutions,
Vendors and Processors

Partnering with multiple vendors lets you offer a wider range of products to customers, but the different file requirements, schedules and integration points can be cumbersome to manage. File Exchange: Transmission Services from Fiserv allows you to consolidate data delivery into a single connection point, reducing costs and improving efficiency.

In this new era of meticulous security and shorter processing windows, File Exchange is the file transfer solution optimized for high volume, secure and assured delivery of files.

File Exchange: Transmission Services is an outsourced, scalable file transmission service that enables efficient file movement between your financial institution, vendors and processors while also offering data verification, scheduling, and 24/7 monitoring and support. It eliminates unnecessary costs associated with multiple connection points and in-house IT support.

Transmission Services can help you improve productivity and collaboration among your vendors, partners, and members or customers by enabling the quick, easy and secure exchange of sensitive business data. You can eliminate the effort of installing software, managing servers and designing networks while keeping pace with compliance regulations for data exchange.

Flexible Scheduling Options

- Automatically pull, process and push files on a scheduled, event-driven or on-demand basis through the workflow and file transfer process management system

Data Verification/Prescreening

- Validate incoming data prior to the data being received by the end processing system
- Ensure data contains the correct information and key fields required for processing
- Detect duplicate files based on multiple criteria
- Track and monitor inbound delivery of data on a predetermined schedule
- Count on Fiserv to generate, review and work to resolve notifications for missing, late or inaccurate data transmissions

Scalability

- Take advantage of a scalable architecture to handle your most demanding loads from high volumes of small files to multi-gigabyte files
- Manage data transmission growth without resource increases

Efficiency-Boosting Automation

- Eliminate the uncertainties associated with manual methods and provide 24/7 Fiserv-staffed management of data transfers
- Shift manual processes to an automated solution

Security

- Gain end-to-end encrypted transfer and storage of data and files
- Transfer data in multiple electronic formats using industry-accepted secure communication methods and protocols
- Rely on security and a Fiserv team that is available 24/7
- Secure and protect data transfers while meeting current regulatory requirements and staying on the leading edge of new requirements
- Decrease risk and liability by removing the security exposure for file-based transfers
- Route credit card and other client-sensitive data securely with PCI DSS compliant service and data center

Data Transformation

- Leverage sophisticated data transformation flexibility to map required data elements to required industry or proprietary formats

- Aggregate data from multiple sources for delivery to a single end point
- Parse data from a single source to multiple end points
- Access hundreds of format templates already established within the File Exchange format library
- Request a new format with virtually any-to-any translation functionality created to suit your specific needs

Key Benefits

- Improves efficiency and productivity by automating manual processes
- Consolidates file activities
- Lowers overhead and maintenance
- Increases data and file security
- Offers 24/7 Fiserv-staffed monitoring and support

About File Exchange

File Exchange is an end-to-end outsourced data delivery solution that can help you improve productivity and collaboration among your vendors, partners, and members or customers by exchanging sensitive business data – quickly, easily and securely. It provides advanced tracking that optimizes your data delivery oversight capabilities and delivers the automation and control required to reduce expenses.

What makes File Exchange unique in the transmission product industry is its ASP model, eliminating the need for additional IT resources to procure, install and maintain expensive data transfer applications and onsite equipment. File Exchange is a complete, end-to-end file transfer service.
