VisionPLUS®

Step Up Your Competitive Edge – Unlock the
Value in Your Account Processing Portfolio

financial services @ the speed of life®

fiserv.

VisionPLUS from Fiserv provides an enterprise account processing platform for your customers' payment cards, loans, and prepaid and commercial card products. Our platform easily integrates with other systems to provide a holistic view of customer account relationships.

Step Up Your Competitive Edge With Faster Time to Market

Simplified technology and service-based architecture maximize easy rollout of new products and services.

Ride the Latest Wave of Innovation

Leverage open APIs for quicker application development and integration.

Accelerate your platform technology modernization with full-service architecture, API drag-and-drop build and SDK technology simplification. Enable rapid digital deployment for your customers to self-service their accounts.
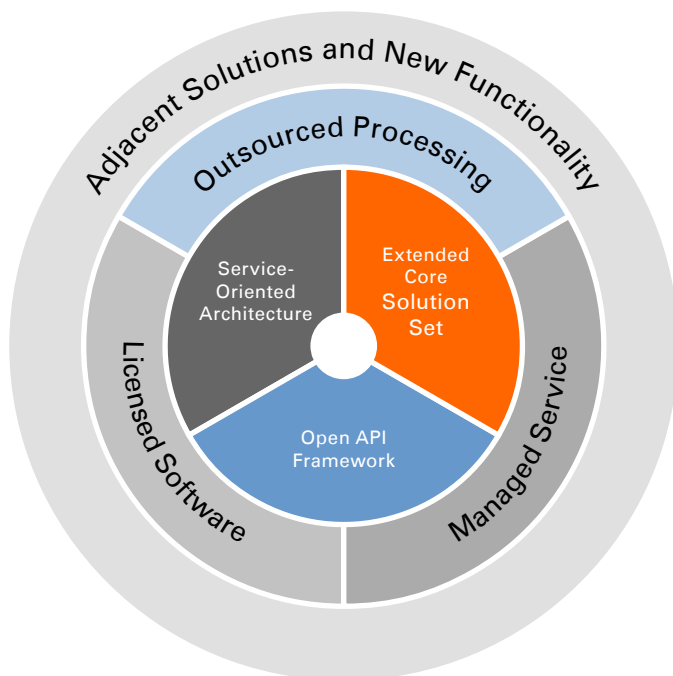

Speed to Market

More than 1,000 off-the-shelf APIs and a custom API builder streamline coding efforts and enable faster integration with external systems.

Take Advantage of New Revenue-Generating Opportunities

Harness creative new solutions from around the world – all in one platform.

## Reduce the Cost of Operating Your Business

VisionPLUS offers a new deployment model and infrastructure option that lowers the cost per account.

Adjacent Solutions and New Functionality — Outsourced Processing — Managed Service — Licensed Software — Service-Oriented Architecture — Extended Core Solution Set — Open API Framework

Single Code Deployment – VisionPLUS deploys without installation as a single implementation, improving your time to market. Consolidated edits and cross-edits housed centrally in a single data-access layer reduce time spent making changes.

Auto-Generated User Interface (UI) Displays – UI displays generated directly from APIs are faster than making green screen changes.

Cost Efficiencies

Less Configuration – Instead of heavy coding, VisionPLUS provides over 2,000 parameters plus a set of utilities to support changes, reducing your development time and costs.

API Framework – Reduce your need to build or maintain additional versions of services.

Automated Workflow Solutions – An intuitive UI, rules-engine support and case-management capabilities can improve the customer experience while reducing your operating costs.
