With the number of consumers paying bills online at an all-time high, it’s more important than ever to provide them with a bill pay solution at their financial institution that is intelligent, intuitive and interactive. CheckFree RXP from Fiserv brings the user-friendly features of leading consumer websites to online payments, creating a rich user experience that delivers just-in-time content and intuitive money movement.

Offering CheckFree RXP to your consumers can help you reach your goals of increasing adoption, loyalty and usage of your online financial services.

Payments Made Easy

CheckFree RXP has an intuitive user interface that makes it easy for consumers to pay bills and people they know, view their e-bills, and maintain complete control over their financial activities through the Payment Center. All primary payment activities can be completed directly on the Payment Center without the consumer having to navigate to other pages.

The Payment Assistant presents consumers with just-in-time, relevant information for each biller, such as recent and pending payments. It also includes premium real estate that drives e-bill awareness and adoption, as well as recurring payments awareness and setup.

Product

Used by more than 4,000 financial institutions, CheckFree RXP is the industry’s leading electronic billing and payments solution that delivers on the goal of making the financial institution the center of customers money movement activities.
Extensive E-Bill Offering

As you know, the process for paying bills begins with first receiving the bill, and there is no easier way for someone to receive a bill than through the e-bill service at their financial institution. With CheckFree RXP, consumers can receive electronic delivery of their bills from hundreds of companies through your secure online channel. In fact, Fiserv offers the largest all data-fed e-bill network – no scraped e-bills.

Consumers are notified about the availability of e-bills in multiple areas of the application, and they can sign up easily with just a few clicks. The innovative E-bill Introduction program makes it even easier for a user to try the e-bill service along with their regular financial routine without having to commit to turning off their paper bill. And E-bill Reminders will help ensure that your users pay their bills on time through your bill payment service.

Introducing Popmoney Personal Payments

A new personal payment service, Popmoney®, is now integrated into the CheckFree RXP money movement experience. With Popmoney, your consumers can send or request payments directly from their online or mobile banking service using only the recipient’s email address, mobile phone number or account information. Talk to your Fiserv account executive about how you can integrate Popmoney into your RXP experience.

Optional Features and Services

- Same-Day and Overnight Checks – allows users to schedule and process expedited bill payments
- Account-to-Account Transfers – allows users to transfer funds between accounts at your FI and another
- RXP Widget – integrates primary bill payment and Popmoney services on the online banking page
- Risk Override – allows risk limits to be redefined
- Fee Manager – provides three tiers of pricing for value-added services
- FraudNet™ – a powerful networked fraud detection and prevention engine for security

Innovative Technology

CheckFree RXP has been recognized by leading financial services industry publications for its innovative use of technology, including the “feature pack” upgrade process, which delivers product enhancements and new functionality to thousands of financial institutions simultaneously, in real time, thus eliminating the need for a slow and costly traditional migration process to a new product version.
CheckFree RXP has received industry awards for its intuitive user interface that presents just-in-time information and tasks to consumers, thus enhancing their overall bill pay experience and increasing loyalty to their financial institutions.

Optimize Your Online Channel

Fiserv provides the right solutions that are designed to help financial institutions maximize their online potential and drive increasingly more profitable relationships. Each solution delivers what you’ve come to expect from Fiserv—state-of-the-art security, industry-leading usability and a proven track record in quality product development and technology innovation.

Value-Added Benefits

Fiserv develops new product features and enhancements based on extensive voice of customer input through tools such as surveys, focus groups and usability testing to ensure that the delivered solution provides the best customer experience.

As a Fiserv client, you also are provided additional value-added services such as marketing solutions to drive adoption of online services, analytical insights and consumer intelligence. These services have been designed using the knowledge and insight obtained through years of experience working with top-tier financial institutions and industry experts.

Also available is the Fiserv Boardroom Series, a complimentary community of more than 10,000 financial executives, which provides strategic insights to help improve business performance.
